CHOW, MING

ART UNIT

PAPER NUMBER

2645

DATE MAILED: 07/05/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/051,697

Applicant(s)

CASTELL ET AL.

Examiner

Ming Chow

Art Unit

2645

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-9, 14, 17-22, 27-35, 41-43 and 45 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 6-9, 14, 17-22, 27-35, 41-43 and 45 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08).
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Information Disclosure Statement

1. The information disclosure statements filed on 5-15-02, 11-25-02, 3-24-03, and 10-28-03 fail to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement.

The IDS filed as stated above have only a cover page of each filing. There are no PTO-1449 forms with listing of references associating with each filing on the record.

Claim Objections

2. Claim 18 recites the limitation "the user" (line 5). There is insufficient antecedent basis for this limitation in the claim.

Drawings

3. The drawings are objected to because proper legends, for example, items 110b, 130 Fig. 1, item 240 Fig. 2, item 312, 313, 316 Fig. 5 (this is not intended to be a complete listing), were missing. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. See 37 CFR 1.84(o).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 42 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The phrase “after a command is selected, transmitting.....operating commands” is not disclosed by the specification. The specification did not support when “one” command is selected multiple operating commands (plural) are transmitted.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6, 7, 9, 14, 18, 22, 30-35, 41-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al (US: 6333973), and in view of Rodriguez et al (US: 6580784).

For claims 6, 7, 9, 14, 18, 30, 31, Smith et al teach on Fig. 5, a unified messaging system including voicemail, FAX, and email servers (claimed “data store”). Smith et al teach on Fig. 2, wireless mobile communication device.

Smith et al teach on column 4 line 21-24, storing the voicemail and sending a short message notifying the user of the pending voicemail. Smith et al teach on column 7 line 51-55, the notification includes caller’s name and telephone number, and a time and date stamp (claimed “information regarding the voicemail message”).

Smith et al teach on Fig. 7A and 7B, displaying voicemail message information on the display interface. Smith et al teach on column 9 line 54-60, selecting the voicemail icon to play the voicemail (reads on claimed “providing the message retrieval command” and “a connection request”). Therefore, each display entry is a message retrieval command. Smith et al teach on column 9 line 62-65, the command is translated into DTMF tones to control voicemail server. The command (DTMF tones) must be transmitted from the mobile device to the unified messaging system.

Smith et al teach on column 10 line 1-2, playback the voicemail (transmitting the voicemail to the mobile device).

Smith et al failed to teach “the voice mail system initiates a voice call to the wireless mobile device”. However, Rodriguez et al teach on column 4 line 12-22, a voicemail system initiates a call to a mobile telephone. It is inherent that a voicemail (audible) is transmitted via a voice channel.

It would have been obvious to one skilled at the time the invention was made to modify Smith et al to have “the voice mail system initiates a voice call to the wireless mobile device” as

Art Unit: 2645

taught by Rodriguez et al such that the modified system of Smith et al would be able to support the system users convenience of having the voice mail system to initiate a call to the mobile device.

Regarding claim 22, see Fig. 5 and column 4 line 1-7 .

Regarding claims 32, 33, see Fig. 7A and 7B.

Regarding claims 34, 35, see column 6 line 3-6 and Fig. 10.

Regarding claim 41, see Fig. 10.

Regarding claims 42, 43, see column 9 line 61-65.

6. Claims 8, 17, 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al, in view of Rodriguez et al, and further in view of Brilla et al (US: 6389276).

Regarding claims 8, 17, 27, 29, the modified system of Smith et al in view of Rodriguez et al as stated in claim 6 above failed to teach “an email message including the information regarding the voice mail message and transmitting the email message to the mobile device”. However, Brilla et al teach on column 17 line 10-20, voicemail notification by emails.

It would have been obvious to one skilled at the time the invention was made to modify Smith et al in view of Rodriguez et al to have “an email message including the information

Art Unit: 2645

regarding the voice mail message and transmitting the email message to the mobile device” as taught by Brilla et al such that the modified system of Smith et al in view of Rodriguez et al would be able to support the system users convenience of using emails for notifications.

Regarding claim 28, rejections as stated in claim 27 above apply.

The modified system of Smith et al in view of Rodriguez et al and further in view of Brilla et al as stated in claim 27 above failed to teach “e-mail messages are stored at an e-mail server”. However, “Official Notice” is taken that emails are stored at an email server is old and well known to one skilled in the art.

It would have been obvious to one skilled at the time the invention was made to modify Smith et al in view of Rodriguez et al and further in view of Brilla et al to have “e-mail messages are stored at an e-mail server” such that the modified system of Smith et al in view of Rodriguez et al and further in view of Brilla et al would be able to support the system users conveniences of having an email server to maintain email messages.

7. Claims 19, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al, in view of Rodriguez et al, and in view of Swistock (US: 6389115).

Smith et al teach on item 5600 Fig. 5, a voicemail server (claimed “voicemail system”) integrated within the unified messaging system.

The modified system of Smith et al in view of Rodriguez et al as stated in claim 18 above failed to teach “a PBX coupling the voicemail system to a wireless voice network”. However, Swistock teaches on Fig. 1A, a PBX coupling a voicemail system to a wireless voice network.

It would have been obvious to one skilled at the time the invention was made to modify Smith et al in view of Rodriguez et al to have “a PBX coupling the voicemail system to a wireless voice network” as taught by Swistock such that the modified system of Smith et al in view of Rodriguez et al would be able to support the system users convenience of using a PBX to couple the voicemail system and the wireless voice network.

8. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al in view of Rodriguez et al.

Smith et al teach on Fig. 7A and 7B, reference identification in the notification message.

The modified system of Smith et al in view of Rodriguez et al as stated in claim 18 above failed to teach “including the reference identification in the command signal”. However, “Official Notice” is taken that including the identification in the “retrieving message” command to access the desired message is old and well known to one skilled in the art.

It would have been obvious to one skilled at the time the invention was made to modify Smith et al in view of Rodriguez et al to have “including the reference identification in the command signal” such that the modified system of Smith et al in view of Rodriguez et al would be able to support the system users convenience of selecting the desired message without worrying detail information included in the command.

9. Claim 45 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al, in view of Rodriguez et al, and further in view of Fougnyes (US: 6434378).

Art Unit: 2645

Smith et al in view of Rodriguez et al teach incoming call from a voice mail system to the mobile device for playing the voicemail messages. The mobile device must recognize the incoming call for receiving and playing the voicemail messages.

The modified system of Smith et al in view of Rodriguez et al as stated in claim 18 above failed to teach “automatically answering the incoming call without a ringing”. However, Fougnes teaches on column 5 line 19-20, a cellular telephone has features of auto answer and silent ring.

It would have been obvious to one skilled at the time the invention was made to modify Smith et al in view of Rodriguez et al to have “automatically answering the incoming call without a ringing” such that the modified system of Smith et al in view of Rodriguez et al would be able to support the system users convenience of automatically playing the voicemail messages without ringing the phone.

Response to Arguments

10. Applicant's arguments filed on 5/19/05 have been fully considered.
 - i) Applicant repeatedly argues, on page 11, regarding objections to the drawings. The Examiner has clearly stated the objections in the previous and current office actions.

Art Unit: 2645

The Examiner has also directed the Applicant, in the previous Office Action, and here in this Office Action again, to refer to 37 CFR 1.84(o) for this objection.

- ii) Applicant requests considerations of IDS. However, no PTO-1449 forms were found on the record.

Conclusion

11. The prior art made of record and not replied upon is considered pertinent to applicant's disclosure.

- Wagner et al (US: 6169911) teach graphical user interface for a portable telephone.

12. Any inquiry concerning this application and office action should be directed to the examiner Ming Chow whose telephone number is (571) 272-7535. The examiner can normally be reached on Monday through Friday from 8:30 am to 5 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang, can be reached on (571) 272-7547. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Customer Service whose telephone number is (571) 272-2600. Any response to this action should be mailed to:
